

HOPEBED — FIRST 5 CUSTOMERS + 2 PG PARTNERS

Founder Pilot Playbook / Panvel & Navi Mumbai

1. The Goal

Do not try to build a large marketplace first. Prove the manual marketplace loop with a small pilot:

- 2 PG / hostel / property partners
- 5 genuine accommodation seekers
- 1 successful match or booking
- Document what users and owners actually need

Core proof: 2 properties — 5 seekers — 1 match — 1 booking.

2. Get the First 2 PG / Property Partners

Start with the strongest prospects from the completed Panvel / Navi Mumbai research:

- Vijay Cozy Corner Hostel — Ulwe — +91 99200 10092 / +91 9137334269
- StayZone Hostels — Kharghar — +91 8452889995 / info@stayzonehostels.com

Recommended offer:

- First-20 early partner pilot
- Free for 3 months
- No upfront cost
- Zero brokerage
- Founder personally helps create and verify the listing
- Ask for honest feedback and permission to use results as a case study later

3. 30-Second Owner Pitch

"I'm Shahrukh, Founder of Hopebed. We're building a verified-stay platform for PGs and hostels in Panvel and Navi Mumbai. I'm selecting our first 20 partner properties and offering a free 3-month pilot with no upfront cost and zero brokerage. I'd like to understand how you currently handle enquiries and vacant beds and see whether Hopebed can help. Could I take 10 minutes to show you the idea?"

4. Validate the Owner Problem Before Selling

1. How many platforms are you currently listed on?
2. When a bed becomes vacant, how do you find the next tenant?
3. How many enquiries actually convert into tenants?
4. Do you manage most enquiries through WhatsApp?
5. What would make you trust a new platform enough to try it?

Record the owner's words as closely as possible. Do not replace the answer with your own assumption.

5. Get the First 5 Customers

Focus on people who are already looking for accommodation rather than broad advertising.

Target segment: students and working professionals in Kharghar, Panvel, New Panvel, Kamothe, Kalamboli, Taloja and Ulwe.

Search for active accommodation requests in relevant Reddit, Facebook, WhatsApp, Telegram and student/flatmate communities. Respond only where someone is already asking for a PG, hostel, room or similar stay.

6. Customer Message

“Hi! I’m Shahrukh, Founder of Hopebed. I’m currently helping people find verified PG/hostel options in Navi Mumbai and Panvel. I saw that you’re looking for accommodation in [area]. Can you send me your budget, preferred area, move-in date, gender preference and single/sharing requirement? I’ll check the available options and share suitable properties with you.”

7. Collect the Customer Requirement

Requirement	Example
Location	Kharghar
Budget	₹8,000/month
Move-in	15 September
Preference	Male
Room	Twin sharing

Do not send a generic property list. Match the request to the most suitable available property.

8. Manual Matching Process

6. Collect the seeker requirement.
7. Check the two partner properties manually.
8. Select the best match.
9. Send photos, price, location, availability and verification information.
10. Ask whether the seeker wants to speak to the owner / arrange a visit.
11. Record the outcome in the customer tracker.

9. First Successful Match

The first business proof is not website traffic. It is a real seeker who receives a suitable property recommendation and moves toward a visit or booking.

- Enquiry received
- Property matched
- Owner contacted
- Visit arranged
- Booking made

- Feedback collected

Target: 1 successful match or booking is more valuable than a large number of unqualified visitors at this stage.

10. 7-Day Founder Targets

Metric	Target
PG/property partners	2
Available beds	10+
Customer enquiries	5
Qualified customers	5
Property matches	3+
Visits arranged	2+
Successful bookings	1+

11. What NOT to Spend Time On Yet

- Google Ads
- Instagram/Facebook paid ads
- Influencer campaigns
- Large SEO campaign
- Huge property database
- Complex booking automation
- Payment gateway
- Reviews/loyalty systems
- AI chatbot
- Website ads

Founder rule: Do not automate a process before you have done it manually and understand the real pain.

12. Tomorrow's CEO Mission

Before the day ends:

- Talk to 5 property owners.
- Find 5 people who genuinely need accommodation.
- Get at least 1 owner interested in the pilot.
- Try to make at least 1 real property match.
- Record every response and objection.

Hopebed — Stay Smart. Stay Verified.
